

YOU are the speaker we are looking for!

Do you want to be on virtual stage with Daniel Buser, Istvan Urban and many other experts? Take part in our competition for one of the last free time slots of 15-minutes presentations!

Content

Regenerative dentistry.

The idea of this digital congress is to show the use of regenerative procedures in challenging situations and to ensure long-term success. We are eager to know what your innovative techniques/approaches are.

Your video pitch

To apply for YOUR time slot as a presenter, please upload a short inspirational video about the content YOU want to lecture about to www.wetransfer.com or www.dropbox.com and send the download-link to socialmedia@geistlich.ch. After pre-selection, the videos will be uploaded on this webinar platform. If your video is one of the four videos which gained the most “likes”, YOU will be the invited speaker we are looking for!

So, create something special and encourage your network to vote for you!

Duration

60 seconds max

Materials used

Since this is a Geistlich Congress, only applications using Geistlich biomaterials in the lecture will be accepted. If you want to lecture about something more generic (e.g. a suture technique or special instruments that are logically linked with regenerative dentistry), you can apply with a pitch that contains no biomaterials.

Only ON LABEL techniques can be accepted (according to the instructions for use of the products applied).

Timeline

Please send us your video pitch by 30 April, 2020.

Voting is possible until 10 May, 2020.

Lecturer honorarium

500 EURO
